CALCIUM, MEMBRANES, AGING, AND ALZHEIMER'S DISEASE[a]

Editors and Conference Chairs
ZAVEN S. KHACHATURIAN, CARL W. COTMAN, AND JAY W. PETTEGREW

CONTENTS

Introduction and Overview. *By* ZAVEN S. KHACHATURIAN 1

Part I. Interrelations between Membrane Function and Structure

Molecular Insights into Alzheimer's Disease. *By* JAY W. PETTEGREW 5

Regulation of Membrane Function through Composition, Structure, and Dynamics. *By* PHILIP L. YEAGLE 29

Platelet-Activating Factor and Related Ether Lipid Mediators: Biological Activities, Metabolism, and Regulation. *By* FRED SNYDER, TEN-CHING LEE, and MERLE L. BLANK 35

Structure and Dynamics of the Glycolipid Components of Membrane Receptors: ^{2}H NMR Provides a Route to *In Vivo* Observation. *By* IAN C. P. SMITH, MICHÈLE AUGER, and HAROLD C. JARRELL 44

Effects of Calcium, ATP, and Lipids on Human Erythrocyte Sugar Transport. *By* A. CARRUTHERS, A. L. HELGERSON, D. N. HEBERT, R. E. TEFFT, JR., S. NADERI, and D. L. MELCHIOR 52

Part II. Regulation of Intracellular Calcium

Calcium Homeostasis and Aging: Role in Altered Signal Transduction. *By* GEORGE S. ROTH 68

Cycling of Ca^{2+} across the Plasma Membrane as a Mechanism for Generating a Ca^{2+} Signal for Cell Activation. *By* HOWARD RASMUSSEN, PAULA BARRETT, WALTER ZAWALICH, CARLOS ISALES, PETER STEIN, JOAN SMALLWOOD, RICHARD MCCARTHY, and WENDY BOLLAG 73

Regulation of Calcium in Isolated Nerve Terminals (Synaptosomes): Relationship to Neurotransmitter Release. *By* DAVID G. NICHOLLS 81

[a]The papers in this volume were presented at a conference entitled Calcium, Membranes, Aging, and Alzheimer's Disease, which was sponsored by the John Douglas French Foundation, the Pharmaceutical Manufacturers Association, and the National Institute on Aging and held at the Arnold and Mabel Beckman Center of the National Academies of Sciences and Engineering in Irvine, California on October 24–26, 1988.

Ca^{2+} Handling Systems and Neuronal Aging. *By* MARY L. MICHAELIS 89

Aging-Related Increases in Voltage-Sensitive, Inactivating Calcium Currents in Rat Hippocampus: Implications for Mechanisms of Brain Aging and Alzheimer's Disease. *By* PHILIP W. LANDFIELD, LEE W. CAMPBELL, SU-YANG HAO, and D. STEVEN KERR 95

Evidence for Increased Calcium Buffering in Motor-Nerve Terminals of Aged Rats. *By* DEAN O. SMITH 106

Part III. The Cytoskeletal Control of Membrane Properties and Cell Function

Macromolecular Organization of the Neuromuscular Postsynaptic Membrane. *By* STANLEY C. FROEHNER 115

Intracellular Ionic Calcium and the Cytoskeleton in Living Cells. *By* MICHAEL L. SHELANSKI 121

Pyramidal Cell Topography of Microtubule-Associated Proteins and Their Precipitation into Paired Helical Filaments. *By* KENNETH S. KOSIK 125

Calcium-Regulated Contractile and Cytoskeletal Proteins in Dendritic Spines May Control Synaptic Plasticity. *By* E. FIFKOVÁ and M. MORALES 131

Part IV. Excitatory Amino Acid Receptors and Calcium-Dependent Plasticity

Multiple Excitatory Amino Acid Receptor Regulation of Intracellular Ca^{2+}: Implications for Aging and Alzheimer's Disease. *By* CARL COTMAN and DANIEL MONAGHAN 138

Neuronal Ca^{2+} Channels and Their Regulation by Excitatory Amino Acids. *By* RICHARD J. MILLER, SHAWN N. MURPHY, and STEVEN R. GLAUM 149

The Discovery of New Chemical Modulators of the N-Methyl-D-Aspartate Receptor. *By* ALAN P. KOZIKOWSKI, WERNER TUECKMANTEL, and KEITH MALONEYHUSS 159

The Role of Calcium in Long-Term Potentiation. *By* R. A. NICOLL, R. C. MALENKA, and J. A. KAUER 166

Links between Long-Term Potentiation and Neuropathology: An Hypothesis Involving Calcium-Activated Proteases. *By* GARY LYNCH and PETER SEUBERT 171

Part V. Calcium-Dependent Enzymes and Their Role in Neuronal Function

The Protein Kinase C Family in the Brain: Heterogeneity and Its Implications. *By* AKIRA KISHIMOTO, USHIO KIKKAWA, KOUJI OGITA, MARK S. SHEARMAN, and YASUTOMI NISHIZUKA 181

Calcium- versus G-Protein-Activated Phosphoinositide Hydrolysis in Synaptoneurosomes from Young and Old Rats. *By* L. JUDSON CHANDLER and FULTON T. CREWS 187

Do Activity-Dependent Changes in Expression of Regulatory Proteins Play a Role in the Progression of Central Nervous System Neural Degeneration? *By* MARY B. KENNEDY 193

Calcium-Activated Neutral Proteinases as Regulators of Cellular Function: Implications for Alzheimer's Disease Pathogenesis. *By* RALPH A. NIXON .. 198

On the Mechanism whereby Phosphorylation Modulates Protein Folding: Relevance to Protein Tangles and Plaques of Alzheimer's Disease. *By* DAN W. URRY, D. K. CHANG, and K. U. PRASAD 209

Part VI. Calcium-Mediated Neuronal Degeneration

Glutamate Neurotoxicity, Calcium, and Zinc. *By* DENNIS W. CHOI, JOHN H. WEISS, JAE-YOUNG KOH, CHADWICK W. CHRISTINE, and MATTHIAS C. KURTH 219

Neurotoxicity at the N-Methyl-D-Aspartate Receptor in Energy-Compromised Neurons: An Hypothesis for Cell Death in Aging and Disease. *By* R. C. HENNEBERRY, A. NOVELLI, J. A. COX, and P. G. LYSKO 225

Calcium, Excitotoxins, and Neuronal Death in the Brain. *By* BO K. SIESJÖ, FINN BENGTSSON, WOLFGANG GRAMPP, and STEN THEANDER 234

Calcium-Induced Neuronal Degeneration: A Normal Growth Cone Regulating Signal Gone Awry (?) *By* S. B. KATER, M. P. MATTSON, and P. B. GUTHRIE 252

Part VII. Calcium Homeostatis and Aging in Nonneuronal Cells

Changes in Calcium Homeostasis during Aging and Alzheimer's Disease. *By* CHRISTINE PETERSON, RATIV RATAN, MICHAEL SHELANSKI, and JAMES GOLDMAN 262

Defective Calcium Signal Generation in a T Cell Subset That Accumulates in Old Mice. *By* RICHARD A. MILLER 271

Membrane Signal Transduction in T Cells in Aging Humans. *By* SUDHIR GUPTA 277

Calcium and Proto-Oncogene Involvement in the Immediate-Early Response in the Nervous System. *By* JAMES I. MORGAN and TOM CURRAN 283

Index of Contributors 291

Financial assistance was received from:

- JOHN DOUGLAS FRENCH FOUNDATION (through a grant from ALLIED-SIGNAL CORP.)
- NATIONAL INSTITUTE ON AGING/NATIONAL INSTITUTES OF HEALTH
- PHARMACEUTICAL MANUFACTURERS ASSOCIATION
- SIGMA TAU FOUNDATION

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of the Academy. The Academy has no intent to influence legislation by providing such forums.
